

LOGNOTE -- INTERNET Control Center Staff

19 September 1986

1. (Briggs) TV FEEDS FOR STATE DEPARTMENT -- As a follow-up to a meeting that [] and I attended at the State Department to discuss their requirements for Soviet television (see Stratman's 3 June 1986 lognote), Emanuel Coltatu of State's Office of Communications (ph. 644-3247), who had attended the June meeting, came over to talk to John and myself about the possibility of getting TV feeds. We described the plans for INTERNET and the current operations of the Langley TVRO, and Coltatu asked if it would be possible for State to get a feed of the TVRO material. With the concurrence of C/Ops, I called Coltatu today and gave him the name of a C&P contact, provided by [], to call to see about arranging a feed to the State Department from Radio Center in D.C., from where the feed to Key Building from the TVRO is relayed. I emphasized to Coltatu again the temporary nature of the Radio Center arrangement, and he said that he understood but that his "bosses" are anxious to get Soviet TV. I asked Coltatu to keep us informed of their plans/progress toward getting a TV feed, which they will arrange on their own.
